Optimized Quality.

AI & IoT intelligence to optimize oil & gas quality, logistics, and trading.

Validere Centrifuge Tube Reader (CTR)

Trust, record, and audit your BS&W centrifuge tests.

Basic sediment and water (BS&W) tests are difficult to measure accurately in real-time and almost impossible to audit. Validere's CTR takes the error out of water cuts, and provides transparent results.

BENEFITS

▸ **know real-time BS&W across your assets** - fast and accurate readings

▸ **promptly resolve custody transfer disputes** - access results in Validere 360

▸ **trust your BS&W results** - take the guesswork out of centrifuge tests

FEATURES

▸ AI-enabled meniscus reading to avoid human error

▸ automatic data upload to Validere 360 for comprehensive audit trail

▸ fluorescence imaging to identify hidden emulsions in the crude layer
